

Steel Dump Trailers Reach A New Level

The JMH Monster U Body *The Ultimate Frameless U Body Trailer*

The Monster U Body Frameless is the latest in the U Body Trailer Series by JMH Trailers serving the heavy hauling industry. Designed for the roughest hauling application, this trailer is also used dockside as a drive on forklift loading and unloading trailer.

A long list of standard features include a 90+ yards payload capacity at 42' with 94" side height, the JMH Monster U Body Dump Trailer is quite possibly the world's most durable trailer of it's kind offering the ease of drive on forklift loading and unloading as well as traditional dumping applications.

The U Body comes standard as a frameless steel trailer, (Framed Also Available) precision engineered and constructed of 450 Hardox™ Steel for the 3/16th thick floor, 90 degree rear and sloped front and 3/16th thick Hardox steel for the 5 ribbed sides. This incredible steel trailer features "4 on the floor" dumping capabilities which means both 102" 25,000 lb. rear axles and wheels remain on the ground during the entire dump process, with the rear axle ABS equipped. The four on the floor feature delivers increased safety and stability.

Watson and Chalin® provide the single point suspension on the U Body assuring long-term load stability. Other features include a Heavy-duty top rail, barn-door with w/ skid plate, is standard with air flow gate option available and top of the line Aero™ electric tarp system. The JMH U Body comes with a long list of standard features and custom options consisting of the industry best components. The JMH Trailers U Body is sure to make another serious impact in the heavy hauling industry.

JMH Trailers Inc., renowned innovators in the truck and trailer industry for over 40 years, JMH Trailers has built their reputation on manufacturing some of the toughest longest lasting heavy application trailers in the world. Some of their original steel trailers are still on the road after 40 years!
