

Steel Dump Trailers Reach A New Level

Steel dump trailers have reached a new level with the unveiling of the U Body from JMH Trailers Inc.

JMH Trailer's U Body Steel Dump Trailer *The Ultimate U Body Trailer*

This extra heavy-duty U Body trailer is the first in the series of U Body steel dump trailers targeting scrap hauling and other heavy hauling applications that offer loading dock drive on forklift loading and unloading.

Offering up to 80 cubic yard payload capacity, the JMH U Body Dump Trailer is quite possibly the world's most durable trailer of it's kind offering the ease of drive on forklift loading and unloading.

The U Body comes as either a framed or frameless steel trailer, precision engineered and constructed of 450 Hardox™ Steel for the 3/16th thick floor, rear and sloped front and 3/16th thick Hardox steel for the 5 ribbed sides. This incredible steel trailer features “4 on the floor” dumping capabilities which means both ABS equipped, 102” 25,000 lb. rear axles and wheels remain on the ground during the entire dump process. The four on the floor feature delivers increased safety and stability.

Watson and Chalin® provide the single point suspension on the U Body assuring long-term load stability. Other features include a Heavy-duty top rail clean-off, heavy-duty front rail, barn-door with w/ skid plate and top of the line Aero™ electric tarp system with cab mounted switch. The JMH U Body comes with a long list of standard features and custom options consisting of the industry best components. The JMH Trailers U Body is sure to make another serious impact in the heavy hauling industry.

JMH Trailers Inc., renowned innovators in the truck and trailer industry for over 30 years, JMH Trailers has built their reputation on manufacturing some of the toughest longest lasting heavy application trailers in the world. Some of their original steel trailers are still on the road after 30 years!
